

Added another BBD to get longer delay time.
 Added an LED delay time indicator.
 Changed the LPF cut-off frequency. (1.4 times the original)
 The maximum delay time should be up to 500ms.
 MMBT3904 is a surface mount type of 2N3904.
 (Note that the MMBT3904 and 2N3904 have different pinouts.)
 25K208 can be replaced with 25K30A and other JFETs.
